

2. Where, Groupby, having, order by, set operations(union,intersect), aggregate functions(min,max,count,sum,avg)

The screenshot displays a database management tool interface. On the left is a sidebar with navigation options like 'er Status', 't Connections', 's and Privileges', 'as and System Variables', 'Export', 'Import/Restore', 'up / Shutdown', 'er Logs', 'ons File', 'UNCE', 'board', 'ormance Reports', and 'ormance Schema Setup'. The main area shows a SQL query editor with the following code:

```
136 GROUP BY salesman_id
137 HAVING COUNT(*) >= 2;
138
139
140 • SELECT ord_date,
141        MAX(purch_amt) AS highest_purchase
142 FROM orders
143 GROUP BY ord_date
144 HAVING MAX(purch_amt) > 2000;
```

Below the query editor is a 'Result Grid' showing the following data:

ord_date	highest_purchase
2012-10-10	2480.40
2012-07-27	2400.60
2012-09-10	5760.00
2012-04-25	3045.60

On the right side, there is a help panel with the text: 'Automatic context help disabled. Use the toolbar manually get help for current caret position or toggle automatic help'. Below the result grid, there is a 'Context Help' tab and a 'Snippets' tab. At the bottom, there is an 'Output' section with a table showing the execution results of the query.
